

Some information about the author of this presentation Tatyana Ogneva

The winner of the chess teachers of Russia 2018

My workplace for 18 years

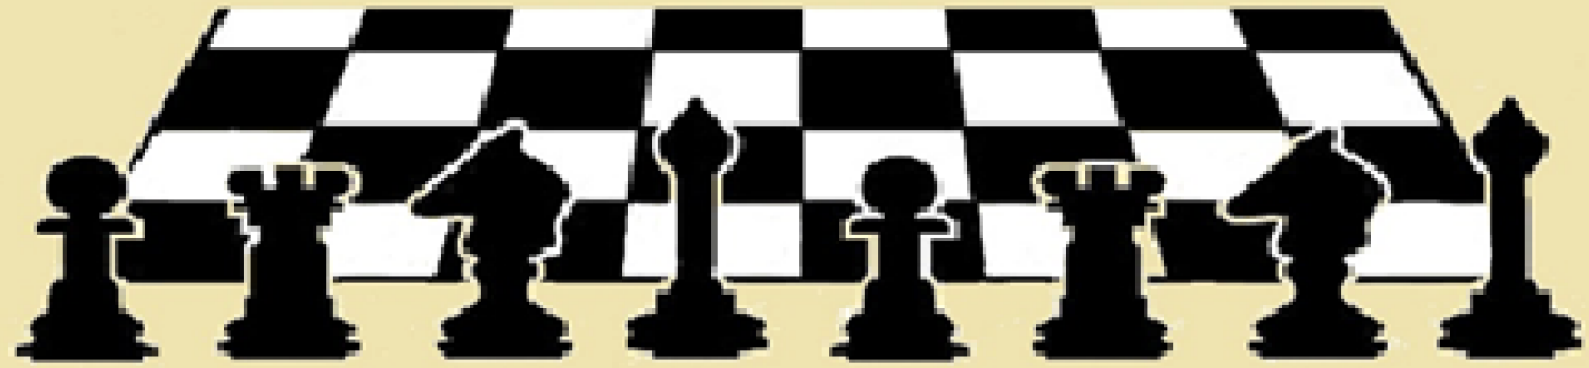

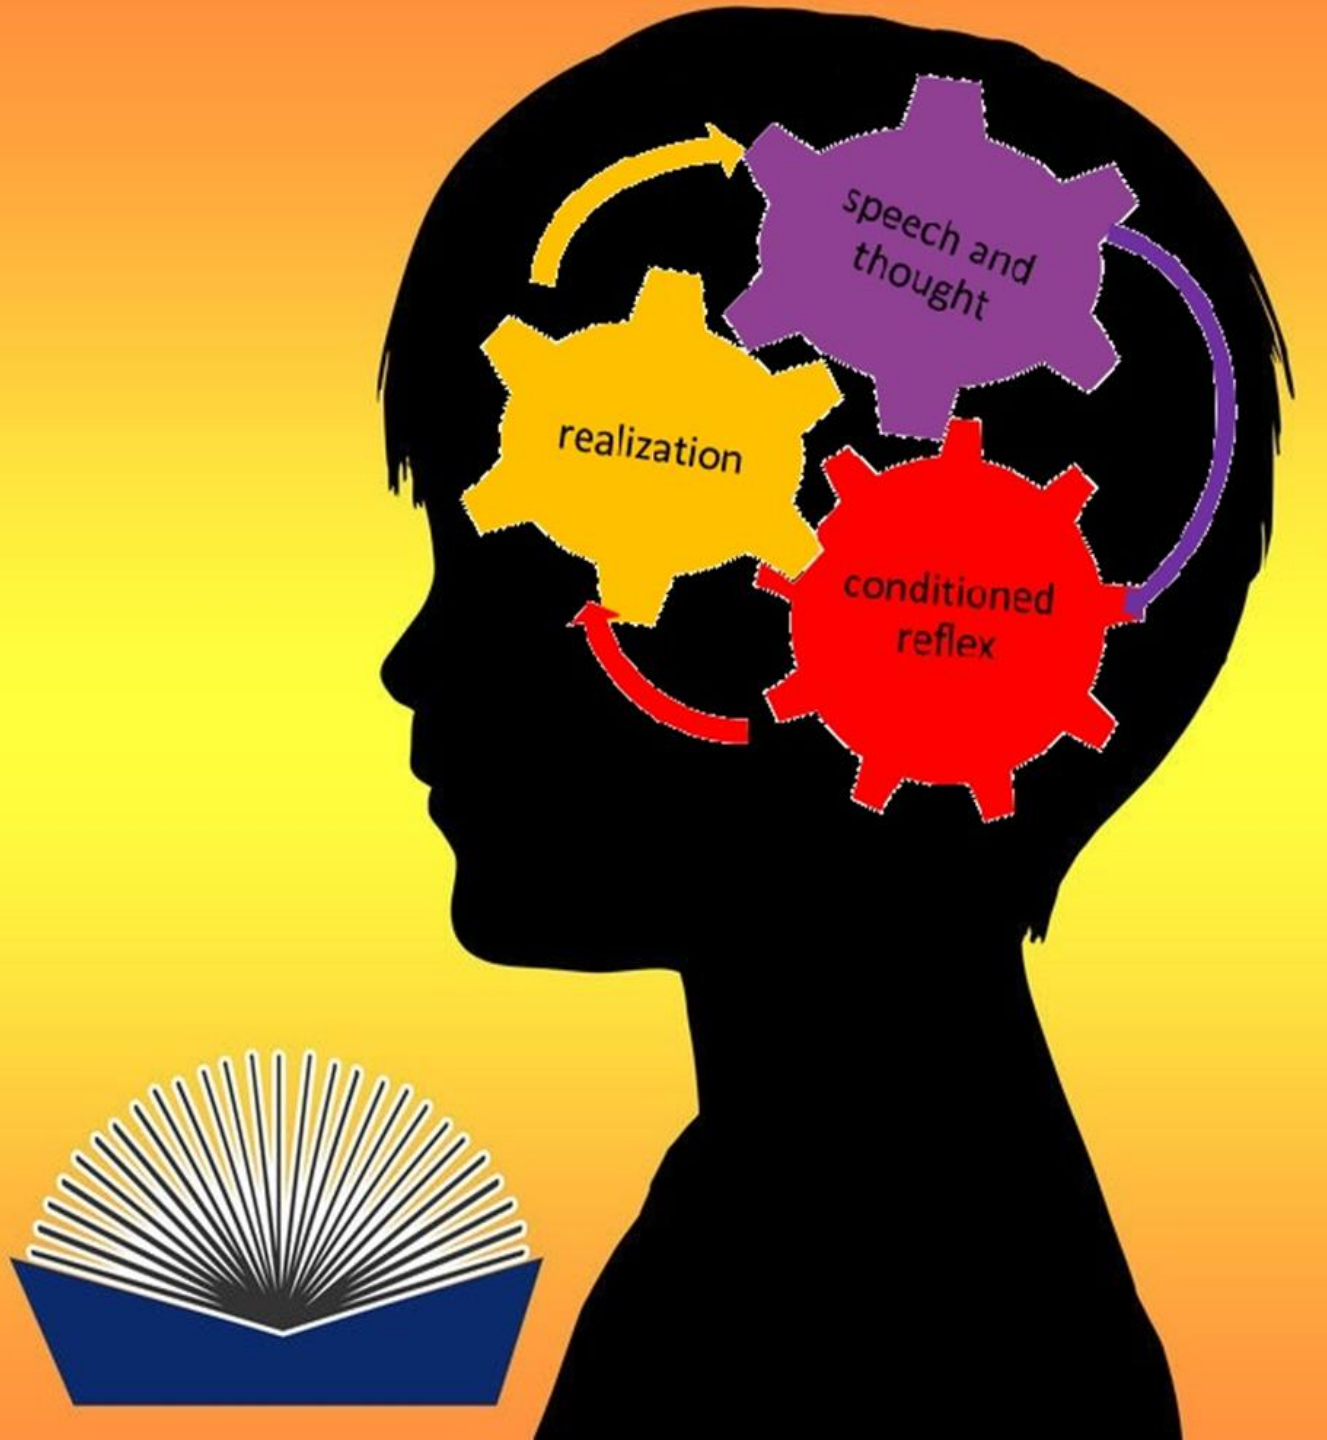

Winner of the chess and mathematics conference competition in London 2014

C

The first stage is characterized as a conditioned-reflex one. At this stage, the child acts fast, without thinking. His or her actions are built based on the stimulus-response principle.

At the second stage, the child acts more consciously, slowly. At this stage, the child is able to learn.

At the third stage, speech plays a critical part. It becomes a regulator of behavior. During this period, the child becomes able to perceive generalizing concepts, paradigms, ideas, and plans.
